No. 1

# THE REVIEW OF PHYSICAL CHEMISTRY OF JAPAN

Founded in 1926

## CONTENTS

<b>Noriyuki Sotani</b> : ESR Studies of the Hexagonal Hydrate of Molybdenum Oxide and Its Changes on Treatments in Vacuo and in Hydrogen .....	1
<b>Noriyuki Sotani</b> : The Reaction between Thiophene and Hydrogen on the Hexagonal Hydrate of Molybdenum Oxide .....	9
<b>Etsuko Inada</b> : The Pressure and Temperature Effects on the Walden Products of $\text{Na}^+$ , $\text{K}^+$ , $\text{Cs}^+$ and $\text{I}^-$ in Water .....	19
<b>Kiyoshi Shimizu, Noriaki Tsuchihashi and Yoshio Furumi</b> : Effect of Pressure on Dissociation of Nickel Sulfate Ion Pair .....	30
<b>Koichi Watanabe, Masahiko Uematsu and Shogo Saegusa</b> : Thermodynamic Properties of Gaseous Propane and Propene .....	39
<b>Erratum</b> : T. Makita, Y. Tanaka and A. Nagashima, Rev. Phys. Chem. Japan, 44, 98 (1974).....	54
<b>Erratum</b> : M. Nakahara and J. Osugi, Rev. Phys. Chem. Japan, 45, 69 (1975) .....	56

THE PHYSICO-CHEMICAL SOCIETY OF JAPAN

# THE REVIEW OF PHYSICAL CHEMISTRY OF JAPAN

(Butsuri-Kagaku no Shinpo)

Found in 1926

**President:** Wasaburo Jono

**Members of Council:**

Michio Okamoto (Chief)

Jiro Osugi

Ryozo Goto

Renpei Goto

Eiji Suito

Hiroyuki Hatano

**Board of Editors:**

J. Osugi (Chief) *Kyoto University*

R. Goto (Associate) *Kyoto Sangyo University*

E. Suito ( " ) *Osaka Institute of Technology*

S. Shida *Yokohama University*

H. Teranishi *Kyoto Technical University*

K. Suzuki *Ritsumeikan University*

K. Kuwata *University of Osaka*

S. Seki *University of Osaka*

R. Fujishiro *Osaka City University*

T. Hayakawa *Prefectural University of Osaka*

Y. Kubokawa *Prefectural University of Osaka*

S. Tsuchihashi *Kobe University*

T. Makita *Kobe University*

S. Hasegawa *Osaka University*

K. Shimizu *Doshisha University*

H. Togawa *Doshisha University*

**Secretary:**

M. Sasaki

K. Hara

M. Nakahara

S. Fukase

June 30, 1976

**Communications to the Editor** should be addressed to Board of Editors, The Physico-Chemical Society of Japan, Faculty of Science, Kyoto University, Kyoto, Japan.

**Business Correspondences** should be addressed to: Secretary, The Physico-Chemical Society of Japan, Faculty of Science, Kyoto University, Kyoto, Japan.

**Purchase Order** should be addressed to: Maruzen Co., Ltd., Nihonbashi, Chuo-ku, Tokyo, Japan.

## Oil and fashion: they're closer than you think

Teijin made industrial history with its now internationally known polyester fibre—Teijin Tetoron.

In fact, Teijin's synthetic fibre technology is so well-known in Asia that there are several joint-capital plants in full operation throughout the area.

And, in order to integrate its operations completely, Teijin has already begun to explore oil

resources which are fundamental to the production of synthetic fibres. That's why people call us the "pioneering corporation", in everything from oil to fashion.

Integrated manufacture from raw materials to finished fabrics.

**TEIJIN**®

A Leader Today... For a Better Tomorrow

Set to go on-stream in mid-1969, MITSUI TOATSU's new facility in Osaka will be the largest single-train urea plant ever built. It employs the latest MITSUI TOATSU Urea Process—the Total Recycle C-Improved Process.

MITSUI TOATSU Urea Processes are now in use in 37 plants in 19 countries, with an additional 12 more plants now under construction. World-wide, the production capacity of these plants is reaching to some 8.2 million tons of urea annually—one third of the world's urea capacity.

On October 1st, 1968, Toyo Koatsu merged with Mitsui Chemicals and changed its name to MITSUI TOATSU CHEMICALS, INC.

*A new name — one to remember every time you think of petrochemicals.*

**MITSUI TOATSU CHEMICALS, INC.**
